

PROJECT PROFILE

Name	Branch Refurbishment UK
Client	Nationwide Building Society
Contractor	Castle Shopfitters, Deane & Amos, Morris & Spottiswood, Edmont Joinery, Barnwood Shopfitters, Rocare
Value	Ongoing
Products	Digital Access Control

Description

BLE have been involved in an ongoing installation programme, to supply and install high security locking systems to counter doors, and other areas of high importance. The work is part of a £300 million pound investment by Nationwide to upgrade its retail network, and high street outlets.

BLE's task was to provide an effective high secure locking arrangement, along with a spy proof combination keyboard to branch counter doors. The finish of the product had to be in keeping with Nationwide's modern design.

BLE have installed a high security electric release of our own manufacture, along with a BLE spy proof digital keyboard, again made in house at BLE, and a BLE access control unit to control the door release system.
